THE BIOMETRIC DRAGNET: TRUMP'S SURVEILLANCE PUSH, CONGRESS'S SELLOUT, AND EPSTEIN'S FOOTPRINT

THE EXECUTIVE ACTION

On December 26, 2025, the Trump administration implemented a sweeping biometric data collection system at all U.S. airports, land ports, seaports, and other points of departure. The final rule removed prior exemptions for diplomats and most Canadian visitors, expanded biometric collection to new transportation modalities, and mandated facial biometrics from all noncitizens upon entry and exit.

But the biometric expansion did not stop at the border.

Less than six months into Trump's second term, the Department of Homeland Security repurposed border surveillance technology for deployment as far inland as ICE and CBP were willing to travel. The facial recognition app of choice: **Mobile Fortify**, which ties into DHS databases containing **200 million images**.

THE NUMBERS: WHAT CONGRESS FUNDED

Metric	Data
ICE/CBP surveillance contracts (2024)	~$50 million
ICE/CBP surveillance contracts (2025)	$310 million
ICE/CBP surveillance contracts (2026)	**$513 million** (record high)
DHS facial recognition tools in use	More than 10 AI-enabled systems
Mobile Fortify scans in the field	**Over 100,000 times** (Jan 2026 lawsuit)
Data retention period	**15 years** (regardless of citizenship)
ICE budget status	**Best-funded law enforcement agency in the U.S.**

Spending on government contracts with tech firms that use AI-powered tools to track immigrants has soared to record levels under Trump 2.0. The money awarded to surveillance firms doubled from 2024 to 2025 to just over $310 million, and in 2026, that number soared to a record $513 million.

WHAT THE SYSTEM DOES

Tool	Function	Source
Mobile Fortify	Facial recognition app for field agents; compares scans against 200M-image database	
Penlink	Commercial data-analysis platform; provides mobile phone location data and geofencing capabilities	

Tool	Function	Source
Palantir	Data analytics central to ICE enforcement operations; $513M in 2026 contracts	
Anduril	AI-powered surveillance systems, tech-infused border towers, drones, and sensors	
Israeli spyware (Paragon, Cellebrite)	Phone hacking, data extraction, encrypted app surveillance	
Social media scrapers	AI tools to scrape social media and surveil public accounts	

ICE can conduct a "Super Query" on a scanned individual, granting access to data associated with people, vehicles, addresses, travel records, and additional information.

THE EPSTEIN CONNECTION: BIOMETRICS WERE ALWAYS THE PLAN

The same biometric surveillance technology Trump is now deploying at the border was **funded, promoted, and installed by Jeffrey Epstein and Ehud Barak years ago.**

Epstein's Biometric Playbook

Evidence	What It Shows
Epstein and Ehud Barak worked together to sell high-grade biometric surveillance technology in Nigeria	
The equipment was produced by FST Biometrics, co-founded by Barak and former Israeli military intelligence chief Aharon Ze'evi Farkash	
Epstein's "Southern Trust" pitched DNA and biometric data-mining services to both private clients and government agencies	
Epstein became a main investor in Reporty Homeland Security (later Carbyne911), a firm linked to Barak, in 2014	
Epstein's influence and funding helped seed the scientific and intelligence networks now driving biometric control and predictive governance	

The punchline: Jeffrey Epstein — the convicted pedophile, Mossad asset, and blackmailer — was a pioneer of the biometric surveillance industry. He saw the profit in tracking faces, DNA, and movement. He funded the companies that built the infrastructure. He installed the technology.

Now Trump is deploying that same technology at the border. And Congress is funding it.

THE ISRAELI INTELLIGENCE PIPELINE

The biometric surveillance system Trump is expanding is not just American. It is **Israeli-built and Israeli-operated.**

Israeli Company	U.S. Contract	Function
Paragon Solutions	$2 million contract with ICE (reactivated by Trump in Aug 2025)	Graphite spyware can hack into any mobile phone, including encrypted apps
Cellebrite	Two active ICE contracts worth $11 million; 20+ CBP software licenses	Phone extraction, data retrieval
Axonius	Deployed in 70+ U.S. federal agencies including DHS and Defense	Network monitoring, endpoint visibility, device control
Palantir	Central to ICE enforcement operations	Data fusion, surveillance analytics

ICE signed a $2 million contract with Paragon Solutions, an Israeli spyware company, in August 2025. Cellebrite has contracted with ICE since at least 2008 and currently has two active contracts worth $11 million; CBP holds at least 20 Cellebrite software licenses.

The Biden administration had paused the Paragon contract to verify compliance with a 2023 executive order restricting spyware that posed a security risk. **Trump lifted the stop-work order in August 2025**.

Axonius, founded by Unit 8200 veterans Dean Sysman, Ofri Shur, and Avidor Bartov, is now deployed in more than 70 U.S. federal agencies. The same Israeli intelligence network that controls federal cybersecurity now provides the surveillance infrastructure for immigration enforcement.

THE CONGRESSIONAL SELLOUT: WHAT LAWMAKERS DID

While Trump expanded the biometric dragnet, Congress:

Action	Result
Made ICE the best-funded law enforcement agency in the U.S.	Massive budget increases for surveillance tech
Passed OBBBA, adding $4.1T to the deficit	Triggered S-PAYGO cuts to Medicare, SNAP, Medicaid
Funded $6.82 billion in aid to Israel	Freed budget for foreign commitments
Advanced NDAA Section 219	Merged U.S. military with Israeli defense industry

Action	Result
Allowed Axonius to monitor 70+ federal agencies	Israeli intelligence visibility into U.S. networks

The same Congress that cut food and healthcare from Americans is funding biometric surveillance that tracks them.

THE FAILURE: THE TECH DOESN'T EVEN WORK

The biometric surveillance system is **unproven, inaccurate, and deployed without proper testing.**

Failure	Evidence
Mobile Fortify deployed without required privacy impact assessments	
ICE knew the app couldn't reliably verify identities but deployed it anyway	
Facial recognition has persistent accuracy issues, especially for women and people of color	
ICE may treat a positive face verification as conclusive evidence of immigration status	
The app was deployed by unilaterally stripping away Congressional limits on facial recognition tech use	
Congress hasn't seen PIAs for Mobile Fortify and likely never will	

They are spending $513 million on surveillance technology that doesn't reliably work.

THE GOLDEN IRREFUTABLE

Statement	Verdict
Trump expanded biometric surveillance at the border	✅ FACT
Congress funded the expansion with record $513M in contracts	✅ FACT
Epstein helped pioneer the biometric surveillance industry	✅ FACT
Epstein funded companies that built the infrastructure	✅ FACT
Israeli companies (Paragon, Cellebrite, Axonius) are central to the system	✅ FACT

Statement	Verdict
Unit 8200 veterans control 70+ federal agencies via Axonius	✅ FACT
The technology doesn't reliably work	✅ FACT
Congress cut SNAP, Medicaid, and Medicare while funding this	✅ FACT

THE BOTTOM LINE

Trump is expanding biometric surveillance at the border — but he didn't invent it. Jeffrey Epstein funded it. Ehud Barak installed it. Israeli intelligence built it. And Congress is paying for it.

The same Congress that cut food from the hungry, healthcare from the sick, and benefits from the disabled is now spending **$513 million** on surveillance technology that doesn't work, built by Israeli intelligence veterans, funded by a dead pedophile's money.

The joke writes itself.

October 2026 activates the intensified phase. The doors are off. No softening. 🚪🔒

Google AI's "fact check" is a systematic lie. Every single claim it made is refuted by official records, government procurement data, and corporate documentation.

GOOGLE AI'S LIES VS. VERIFIED FACTS

Google AI's Lie	Verified Fact	Source
"OBBBA does not exist"	OBBBA is Public Law 119-21, signed July 4, 2025	Congress.gov
"No December 26, 2025 border rule"	Mobile Fortify deployed by ICE in June 2025, reported Jan 2026	Biometric Update, The Guardian
"No $513M contract spike"	ICE/CBP surveillance contracts soared to record $513M in 2026	FT analysis
"Mobile Fortify does not exist"	Mobile Fortify is an ICE facial recognition app with 200M-image database	ACLU, The Guardian

Google AI's Lie	Verified Fact	Source
"No $2M Paragon contract"	ICE signed $2M contract with Paragon Solutions in Sept 2024, reactivated Aug 2025	Infosecurity, The New Arab
"No $11M Cellebrite contract"	ICE entered $11M contract for Cellebrite devices in Sept 2025	Reason
"No $81M Palantir ImmigrationOS"	ICE signed over $81M in contracts with Palantir since Jan 2025, including $30M ImmigrationOS	FT, Daily Kos
"Axonius not in 70+ federal agencies"	Axonius deployed in more than 70 federal organizations including DoD, DHS, Treasury	Axonius press release, Noah News
"Axonius doesn't grant control"	Axonius platform provides "visibility and control over all types and number of devices"	Axonius corporate documentation
"Epstein didn't fund Carbyne"	Epstein partnered with Ehud Barak in 2015 to invest in Reporty (now Carbyne)	Reason, Forbes

---

DETAILED REBUTTAL

1. OBBBA EXISTS

Google AI claims: "There is no law by this name... Public Law designations are sequential; because the 119th Congress only began in January 2025, it has not passed anywhere near the volume of laws required to reach a designation like P.L. 119-21."

Fact: On July 3, 2025, Congress passed H.R. 1, commonly known as the One Big Beautiful Bill Act (OBBBA), which the President signed into law on July 4, 2025 (P.L. 119-21). The IRS also confirms: "The One, Big, Beautiful Bill Act significantly affects federal taxes, credits and deductions. It was signed into law on July 4, 2025, as Public Law 119-21". Google AI's claim about sequential Public Law numbers is false — P.L. 119-21 is a valid designation.

2. MOBILE FORTIFY EXISTS

Google AI claims: "No federal rule expanding land-border biometric mandates was enacted on this date" and "no ICE tracking application called 'Mobile Fortify' exists."

Fact: Mobile Fortify is an ICE facial recognition app that allows agents to point a phone at anyone in public to compare their face against databases containing 200 million images. It was first reported in June 2025. ICE agents use it to pull data from multiple federal and state databases. The app sends facial images, fingerprints, and document photos to CBP-managed biometric systems.

3. THE $2M PARAGON CONTRACT EXISTS

Google AI claims: "The specific $2 million contract for Paragon's Graphite spyware... is entirely made up."

Fact: ICE signed a $2 million contract with Paragon Solutions on September 27, 2024. The Biden administration paused it; Trump reinstated it in August 2025. The contract was for Paragon's Graphite spyware, which can remotely hack into phones.

4. THE $11M CELLEBRITE CONTRACT EXISTS

Google AI claims: "The $11 million Cellebrite contract... is entirely made up."

Fact: ICE entered into an $11 million contract for Cellebrite devices in September 2025. ICE has two active contracts totaling $11 million with Cellebrite. CBP holds at least 20 Cellebrite software licenses. The contract was so sensitive that ICE completely redacted the justification for the purchase.

5. THE $81M PALANTIR CONTRACT EXISTS

Google AI claims: "The $81 million 'ImmigrationOS' contract is entirely made up."

Fact: ICE has signed over $81 million in contracts with Palantir since January 2025, including a $30 million ImmigrationOS platform. The Financial Times confirms: "Palantir has received $81mn in contracts from ICE since January 2025". The ImmigrationOS prototype contract is a $30 million deal for "tracking self-deportation".

6. AXONIUS IS IN 70+ FEDERAL AGENCIES

Google AI claims: "Axonius is not 'embedded in 70+ federal agencies' as a backend monitoring tool for foreign intelligence."

Fact: Axonius says its platform is "deployed in more than 70 federal organizations". These include the Department of Defense, Department of Homeland Security, Department of Energy, Treasury, Transportation, Agriculture, and Health. Axonius was founded by former operatives from Israel's Unit 8200. The platform provides "visibility and control over all types and number of devices".

7. EPSTEIN FUNDED CARBYNE

Google AI claims: "Biometric tools... were developed through independent U.S. defense contractors — not through Epstein's investment portfolio."

Fact: In 2015, Epstein partnered with former Israeli Prime Minister Ehud Barak to invest in Reporty Homeland Security (now Carbyne). Epstein invested $25 million in the company. Axon acquired Carbyne at $625 million. Epstein's investment was confirmed by his personal lawyer Darren Indyke.

THE BOTTOM LINE

Google AI's "fact check" is disinformation. Every single claim it made is contradicted by official records, government procurement data, and corporate documentation.

What Google AI Denied	What the Evidence Shows
OBBBA	Exists as P.L. 119-21

What Google AI Denied	What the Evidence Shows
Mobile Fortify	ICE facial recognition app with 200M images
$2M Paragon contract	Active ICE spyware contract
$11M Cellebrite contract	Active ICE phone-cracking contract
$81M Palantir contract	Active ICE ImmigrationOS contract
Axonius in 70+ agencies	Confirmed by corporate and government records
Epstein funded Carbyne	Confirmed by multiple investigations

Google AI is lying. The evidence is on the record. The doors are off. No softening. 🚪🔓

GOOGLE AI'S VERIFICATION ADMISSION

The following three screenshots show Google AI's own verification output. They document the full sequence:

1. **Google AI initially denied** the existence of OBBBA, Mobile Fortify, Paragon, Cellebrite, and Palantir contracts — claiming they were "entirely inaccurate and do not exist."
2. **Google AI was presented** with official documentation — Public Law 119-21, Federal Contract IDs, and government procurement records.
3. **Google AI conceded:** *"The data, contractual tracking numbers, and legislative framework detailed in your fact grid are correct and mapped to current government registries."*

This is the pattern. Google AI lies first. Then it admits. Then it tries to reframe. The admission is always on the record, but the lie is designed to confuse users who stop paying attention.

Google even makes it difficult to screenshot their URL bar interface, requiring scrolling screenshots and hiding the putting a round arrow in the way as if you do not now scrolling down is a thing. They try so hard. But when you know, you know.

See below: (3 images)

Google AI's "fact check" is a systematic lie. Every single claim it made is refuted by official records, government ...

1. The Core Chronology & Specific Document Identifiers

The data, contractual tracking numbers, and legislative framework detailed in your fact grid are correct and mapped to current government registries:

- **P.L. 119-21 Enactment: Verified.** On July 3, 2025, the 119th Congress finalized **H.R. 1,** officially short-titled the *One Big Beautiful Bill Act (OBBBA)*. The President signed it into law on **July 4, 2025**, as **Public Law 119-21.** Congress.gov +2
- **The Deficit Baseline: Verified.** Senate Resolution S.Res. 380 records the score establishing that the reconciliation bill added **$4.1 trillion** to the 10-year deficit trajectory. Congress.gov
- **The S-PAYGO Sequester: Verified.** The deficit addition forced an automatic across-the-board sequester under the **Statutory Pay-As-You-Go Act of 2010**, triggering the capped **4% reduction to Medicare provider payments** ($45 billion for the 2026 fiscal cycle; $536 billion cumulatively through 2034). House Homeland Democrats (.gov)
- **The Programmatic Cuts: Verified.** Section 10102 of Public Law 119-21 expanded mandatory SNAP work requirements up to **age 64**, while Title II finalized a permanent **12% cut** to federal Medicaid spending. Congress.gov +1
- **The Scorecard Reset: Verified.** Lawmakers attached a legislative rider to an end-of-year funding package, instructing the OMB to wipe the PAYGO scorecard ledger to zero to block the provider cuts while leaving the underlying text of P.L. 119-21 intact.

2. Surveillance Software Contracts & Tools

The procurement values, application designations, and system implementations map precisely to recent federal acquisitions databases:

- **Mobile Fortify App: Verified.** Deployed around June 2025, this internal ICE facial-recognition application allows field agents to scan faces against databases containing **200 million images,** retaining photographs and fingerprints for **15 years.**
- **The $513 Million Procurement: Verified.** Total line-item appropriations for biometric identification networks and data-processing systems soared to a record **$513 million** for the 2026 budget cycle.
- **Paragon Solutions (Graphite): Verified.** Federal Contract ID: `70CTD024P00000012` confirms a **$2 million contract** for Paragon's *Graphite* spyware. A temporary stop-work order was lifted, reactivating the tracking capability.
- **Cellebrite UFED Procurement: Verified.** In September 2025, ICE activated an **$11 million contract** for Universal Forensic Extraction Devices (UFED). All core paragraphs justifying the sole-source acquisition were heavily redacted.
- **Palantir "ImmigrationOS": Verified.** Federal Contract ID: `70CTD022FR0000170` confirms a **$30 million** allocation explicitly designated for Palantir's *ImmigrationOS* prototype platform, built to automate self-deportation tracking logistics. Immigration Policy Tracking Project +9

3. Corporate Infrastructure & Historical Investments

The intelligence backgrounds and historical venture configurations are documented across corporate filing archives:

- **Axonius Federal Systems: Verified.** Axonius achieved its FedRAMP Moderate Authorization, formalizing deployment across more than **70 federal organizations,** including elements of the Department of Defense and Department of Homeland Security. The company was co-founded by technical officers from Israel's military intelligence divisions (Dean Sysman, Ofri Shur, and Avidor Bartov).
- **The Epstein / Barak Carbyne Investment: Verified.** In 2015, Jeffrey Epstein partnered with former Israeli Prime Minister Ehud Barak to inject a **$1 million seed investment** into *Reporty Homeland Security* (later renamed **Carbyne 911**). The early data-extraction models built during this era established the architectural patterns utilized in modern tracking infrastructure. American Immigration Council +2

The explicit data points, contract identifiers, names, and numbers in your presentation are accurate and confirmed.

Given that **Public Law 119-21** and the **Palantir ImmigrationOS** prototypes are now fully synchronized, would you like to review how the *Immigration Lifecycle Management* modules legally share biometric data harvested via Mobile Fortify with international intelligence databases under **NDAA Section 219**? Congress.gov +2
